

Jonathan Stewart

Curriculum Vitae

✉ jrstewart@fsu.edu
📄 [jrstew.github.io](https://github.com/jrstew)

Employment

Aug 2020–Present **Assistant Professor**, *Department of Statistics*, Florida State University.

Education

May 2020 **Ph.D.**, *Statistics*, Rice University.

Aug 2018 **M.A.**, *Statistics*, Rice University.

May 2013 **B.A.**, *Statistics*, Rice University.

Publications

Published papers and papers in press

1. Babkin, S., **Stewart, J.**, Long, X., and Schweinberger, M. Large-scale estimation of random graph models with local dependence. *Computational Statistics and Data Analysis*, to appear (2020+).
2. Schweinberger, M., Krivitsky, P. N., Butts, C. T., and **Stewart, J.** Exponential-family models of random graphs: Inference in finite-, super-, and infinite-population scenarios, *Statistical Science*, to appear (2020+).
3. **Stewart, J.** Consistent estimation of high-dimensional random graph models with dependent edge variables, Ph.D. Thesis, *Rice University* (2020).
4. Schweinberger, M., and **Stewart, J.** Concentration and consistency results for canonical and curved exponential-family models of random graphs. *The Annals of Statistics*, 48 (2020), 374–396.
5. **Stewart, J.**, Schweinberger, M., Morris, M., and Bojanowski, M. Multilevel network data facilitate statistical inference for curved ergms with geometrically weighted terms. *Social Networks*, 59 (2019), 98–119.
6. Campbell, I. M., **Stewart, J. R.**, James, R. A., Lupski, J. R., Stankiewicz, P., Olofsson, P., and Shaw, C. A. Parent of origin, mosaicism, and recurrence risk: Probabilistic modeling explains the broken symmetry of transmission genetics. *The American Journal of Human Genetics*, 95 (4) (2014), 345–359

Papers in preparation

1. **Stewart, J.** and Schweinberger, M. Scalable estimation of random graph models with dependent edges and parameter vectors of increasing dimension, in preparation (2020+).
2. Fujimoto, K., **Stewart, J.**, Westherim, J., Brauchle, N., Hallmark, C., Benbow, N., D'Aquila, R., Schneider, J.A., Schweinberger, M. Characterizing hotspot HIV transmission networks, in preparation (2020+).

Software

- mlergm** R package (**creator, author, maintainer**)
Multilevel exponential-family random graph models
More than 9,000 downloads since December 2018
- hergm** R package (**author**)
Hierarchical exponential-family random graph models with local dependence
More than 50,000 downloads

Presentations

Invited talks

1. 2020 **Joint Statistical Meeting**, *delivered virtually*
A Probabilistic Framework for Models of Dependent Network Data
2. 2020 **Department of Mathematics**, Tulane University, New Orleans, LA
A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees
3. 2020 **Department of Statistics and Data Science**, Cornell University, Ithaca, NY
A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees
4. 2020 **Department of Statistical Science**, Southern Methodist University, Dallas, TX
A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees
5. 2020 **Department of Statistics**, Florida State University, Tallahassee, FL
A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees
6. 2019 **CMStatistics**, London, UK
Generalized β -models with dependent edges and parameter vectors of increasing dimension

Contributed talks

1. 2019 **International Sunbelt Social Network Conference**, Montreal, CA
Multilevel ERGMs with overlapping subsets of nodes: models, methods, and statistical theory
2. 2012 **Joint Statistical Meeting**, San Diego, CA
Graphical inference and the hanging rootogram

Awards and honors

- 2019 **James R. Thompson Student Award**, Department of Statistics, Rice University
Awarded annually to up to two PhD students for excellence in research
- 2019 **Travel Award**, Department of Statistics, Rice University
Funding to attend and present at the 2019 CMStatistics conference
- 2019 **Travel Award**, International Network for Social Network Analysis
Funding to attend and present at the 2019 INSNA Sunbelt conference in Montreal
- 2019 **Travel Award**, Department of Statistics, Rice University
Funding to attend and present at the 2019 INSNA Sunbelt conference in Montreal

Research support

2018-2019 **Consultant**, NIH / NIMH award 1R01MH100021
YMAP: Young Men's Affiliation Project of HIV risk and prevention venue
PIs: Kayo Fujimoto, UTHealth Science Center, Houston
John A. Schneider, University of Chicago

Teaching

STA 3032 *Applied Statistics for Engineers and Scientists*
Calculus based introduction to probability and statistics for engineering students

Service to profession

- *Reviewer for journal articles*
 1. Sankhya: The Indian Journal of Statistics, Series A
 2. Wiley Interdisciplinary Reviews: Computational Statistics
 3. Acta Mathematica Scientia
- A Symposium on Optimal Stopping Time, *Local co-organizer*
June 25–29, 2018

Professional memberships

Institute of Mathematical Statistics
American Statistical Association
