

# Jonathan Stewart

## Curriculum Vitae

✉ [jrstewart@fsu.edu](mailto:jrstewart@fsu.edu)  
📁 [jrstew.github.io](https://github.com/jrstew)

### Employment

Aug 2020–Present **Assistant Professor**, *Department of Statistics*, Florida State University.

### Education

May 2020 **Ph.D.**, *Statistics*, Rice University.

Aug 2018 **M.A.**, *Statistics*, Rice University.

May 2013 **B.A.**, *Statistics*, Rice University.

### Publications

#### *Published papers and papers in press*

1. Babkin, S., **Stewart, J.**, Long, X., and Schweinberger, M. Large-scale estimation of random graph models with local dependence. *Computational Statistics and Data Analysis*, (2020) 107029.
2. Schweinberger, M., Krivitsky, P. N., Butts, C. T., and **Stewart, J.** Exponential-family models of random graphs: inference in finite, super, and infinite population scenarios, *Statistical Science*, 25 (4) (2020), 627–662.
3. **Stewart, J.** Consistent estimation of high-dimensional random graph models with dependent edge variables, Ph.D. Thesis, *Rice University* (2020).
4. Schweinberger, M., and **Stewart, J.** Concentration and consistency results for canonical and curved exponential-family models of random graphs. *The Annals of Statistics*, 48 (2020), 374–396.
5. **Stewart, J.**, Schweinberger, M., Morris, M., and Bojanowski, M. Multilevel network data facilitate statistical inference for curved ergms with geometrically weighted terms. *Social Networks*, 59 (2019), 98–119.
6. Campbell, I. M., **Stewart, J. R.**, James, R. A., Lupski, J. R., Stankiewicz, P., Olofsson, P., and Shaw, C. A. Parent of origin, mosaicism, and recurrence risk: Probabilistic modeling explains the broken symmetry of transmission genetics. *The American Journal of Human Genetics*, 95 (4) (2014), 345–359

#### *Submitted papers*

1. **Stewart, J.** and Schweinberger, M. Pseudo-likelihood-based  $M$ -estimation of random graphs with dependent edges and parameter vectors of increasing dimension, (2021+) arXiv preprint [arXiv:2012.07167](https://arxiv.org/abs/2012.07167).

### Software

`mlergm` R package (**creator, author, maintainer**)

*Multilevel exponential-family random graph models*

More than 9,000 downloads since December 2018

`hergm` R package (**author**)

*Hierarchical exponential-family random graph models with local dependence*

More than 50,000 downloads

---

## Presentations

### Invited talks

1. 2020 **CMStatistics**, to be delivered virtually  
*Maximum pseudolikelihood estimation for models of social network data*
2. 2020 **Department of Statistics**, Florida State University, Tallahassee, FL  
*Scalable and consistent estimation of random graph models using the pseudolikelihood*
3. 2020 **Joint Statistical Meeting**, delivered virtually  
*A probabilistic framework for models of dependent network data*
4. 2020 **Department of Mathematics**, Tulane University, New Orleans, LA  
*A probabilistic framework for models of dependent network data, with statistical guarantees*
5. 2020 **Department of Statistics and data Science**, Cornell University, Ithaca, NY  
*A probabilistic framework for models of dependent network data, with statistical guarantees*
6. 2020 **Department of Statistical Science**, Southern Methodist University, Dallas, TX  
*A probabilistic framework for models of dependent network data, with statistical guarantees*
7. 2020 **Department of Statistics**, Florida State University, Tallahassee, FL  
*A probabilistic framework for models of dependent network data, with statistical guarantees*
8. 2019 **CMStatistics**, London, UK  
*Generalized  $\beta$ -models with dependent edges and parameter vectors of increasing dimension*

### Contributed talks

1. 2019 **International Sunbelt Social Network Conference**, Montreal, CA  
*Multilevel ERGMs with overlapping subsets of nodes: models, methods, and statistical theory*
2. 2012 **Joint Statistical Meeting**, San Diego, CA  
*Graphical inference and the hanging rootogram*

---

## Awards and honors

- 2019 **James R. Thompson Student Award**  
Department of Statistics, Rice University  
*Awarded annually to up to two Ph.D. students for excellence in research*
- 2019 **Travel Award**, Department of Statistics, Rice University  
*Funding to attend and present at the 2019 CMStatistics conference*
- 2019 **Travel Award**, International Network for Social Network Analysis  
*Funding to attend and present at the 2019 INSNA Sunbelt conference in Montreal*
- 2019 **Travel Award**, Department of Statistics, Rice University  
*Funding to attend and present at the 2019 INSNA Sunbelt conference in Montreal*

---

## Research support

- 2018-2019 **Consultant**, NIH / NIMH award 1R01MH100021  
*YMAP: Young Men's Affiliation Project of HIV risk and prevention venue*  
PIs: Kayo Fujimoto, UTHealth Science Center, Houston  
John A. Schneider, University of Chicago

---

## Teaching

STA 3032 *Applied Statistics for Engineers and Scientists*

Calculus based introduction to probability and statistics for engineering and statistics students

STA 4321/5323 *Introduction to Mathematical Statistics*

Course teaching the foundations of probability necessary for a first course in mathematical statistics

---

## Service to profession

– *Journal Referee*

1. Sankhya: The Indian Journal of Statistics, Series A
2. Biometrics
3. Statistical Methods and Applications
4. Wiley Interdisciplinary Reviews: Computational Statistics
5. Acta Mathematica Scientia

– A Symposium on Optimal Stopping Time, *Local co-organizer*

June 25–29, 2018 at Rice University in Houston, TX

<http://www.optimalstopping.com/>

---

## Professional memberships

Institute of Mathematical Statistics

American Statistical Association
