Jonathan Stewart

Curriculum Vitae

Employment

Aug 2020–Present **Assistant Professor**, *Department of Statistics*, Florida State University.

Education

May 2020 **Ph.D.**, *Statistics*, Rice University.

Aug 2018 **M.A.**, *Statistics*, Rice University.

May 2013 **B.A.**, *Statistics*, Rice University.

Publications

Published papers and papers in press

1. Babkin, S., **Stewart, J.**, Long, X., and Schweinberger, M. Large-scale estimation of random graph models with local dependence. *Computational Statistics and Data Analysis*, to appear (2020+).

2. Schweinberger, M., Krivitsky, P. N., Butts, C. T., and **Stewart, J.** Exponential-family models of random graphs: Inference in finite-, super-, and infinite-population scenarios, *Statistical Science*, to appear (2020+).

3. **Stewart, J.** Consistent estimation of high-dimensional random graph models with dependent edge variables, Ph.D. Thesis, *Rice University* (2020).

4. Schweinberger, M., and **Stewart, J.** Concentration and consistency results for canonical and curved exponential-family models of random graphs. *The Annals of Statistics*, 48 (2020), 374–396.

5. **Stewart, J.**, Schweinberger, M., Morris, M., and Bojanowski, M. Multilevel network data facilitate statistical inference for curved ergms with geometrically weighted terms. *Social Networks*, 59 (2019), 98–119.

6. Campbell, I. M., **Stewart, J. R.**, James, R. A., Lupski, J. R., Stankiewicz, P., Olofsson, P., and Shaw, C. A. Parent of origin, mosaicism, and recurrence risk: Probabilistic modeling explains the broken symmetry of transmission genetics. *The American Journal of Human Genetics*, 95 (4) (2014), 345–359

Papers in preparation

1. **Stewart, J.** and Schweinberger, M. Scalable estimation of random graph models with dependent edges and parameter vectors of increasing dimension, in preparation (2020+).

2. Fujimoto, K., **Stewart, J.**, Westherim, J., Brauchle, N., Hallmark, C., Benbow, N., D'Aquila, R., Schneider, J.A., Schweinberger, M. Characterizing hotspot HIV transmission networks, in preparation (2020+).

Software

`mlergm`	R package (**creator**, **author**, **maintainer**)
	Multilevel exponential-family random graph models
	More than 9,000 downloads since December 2018
`hergm`	R package (**author**)
	Hierarchical exponential-family random graph models with local dependence
	More than 50,000 downloads

Presentations

Invited talks

1. 2020 **Joint Statistical Meeting**, *Philadelphia, PA*
   A Probabilistic Framework for Models of Dependent Network Data

2. 2020 **Department of Mathematics**, *Tulane University, New Orleans, LA*
   A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees

3. 2020 **Department of Statistics and Data Science**, *Cornell University, Ithaca, NY*
   A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees

4. 2020 **Department of Statistical Science**, *Southern Methodist Unviversity, Dallas, TX*
   A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees

5. 2020 **Department of Statistics**, *Florida State University, Tallahassee, FL*
   A Probabilistic Framework for Models of Dependent Network Data, with Statistical Guarantees

6. 2019 **CMStatistics**, *London, UK*
   Generalized β-models with dependent edges and parameter vectors of increasing dimension

Contributed talks

1. 2019 **International Sunbelt Social Network Conference**, *Montreal, CA*
   Multilevel ERGMs with overlapping subsets of nodes: models, methods, and statistical theory

2. 2012 **Joint Statistical Meeting**, *San Diego, CA*
   Graphical inference and the hanging rootogram

Awards and honors

2019	**James R. Thompson Student Award**, Department of Statistics, Rice University
	Awarded annually to up to two PhD students for excellence in research
2019	**Travel Award**, Department of Statistics, Rice University
	Funding to attend and present at the 2019 CMStatistics conference
2019	**Travel Award**, International Network for Social Network Analysis
	Funding to attend and present at the 2019 INSNA Sunbelt conference in Montreal
2019	**Travel Award**, Department of Statistics, Rice University
	Funding to attend and present at the 2019 INSNA Sunbelt conference in Montreal

Research support

2018-2019   **Consultant**, NIH / NIMH award 1R01MH100021
YMAP: Young Men's Affiliation Project of HIV risk and prevention venue
PIs: Kayo Fujimoto, UTHealth Science Center, Houston
      John A. Schneider, University of Chicago

Teaching

STA 3032   *Applied Statistics for Engineers and Scientists*
Calculus based introduction to probability and statistics for engineering students

Service to profession

– *Reviewer for journal articles*
  1. Sankhya: The Indian Journal of Statistics, Series A
  2. Wiley Interdisciplinary Reviews: Computational Statistics
  3. Acta Mathematica Scientia

– A Symposium on Optimal Stopping Time, *Local co-organizer*
June 25–29, 2018

Professional memberships

Institute of Mathematical Statistics

American Statistical Association
